

The June Bride

The month of roses and of brides will soon be here. The prospective June bride has now reached the point where attention turns to the arrangements for the new home. Sharing equally with the interest of every detail, even to the selection of the trousseau, are the plans of the home furnishings.

At the PETTIT STORE the prospective bride will find every requirement for the new home. A practically unlimited display from which to make selection—boundless as to assortments of styles, woods and prices.

Goods may be selected now and held for delivery at any future date. No payment is required until delivery is made, and then merely a small one if desired. Subsequent payments may be arranged to suit the customer's convenience. In this and in every other way the June bride will find the PETTIT STORE the ideal place at which to plan and furnish the new home. Aside from the usual furnishings here are

Three Absolute Requirements of the New Home

THE NEW METHOD

Gibson Refrigerators

The Gibson has reached the highest point of perfection in refrigerator construction. By its unique design, based upon a scientific principle, the very greatest amount of refrigeration is obtained with the least possible consumption of ice.

The ice is not wasted—the air as cooled in the ice chamber is carried by means of a series of vents throughout the various food compartments, and a constant and thorough circulation of frigid air is therefore maintained at all times.

Construction, however, is but one of the many interesting features of the Gibson. The "Porcelain" lining, the woven wire shelves, the easy accessibility of all parts, the hardwood, non-warping cases, the cabinet making—all are worthy of more than passing attention. A full line of sizes and styles in stock.

The Boone Kitchen Cabinet

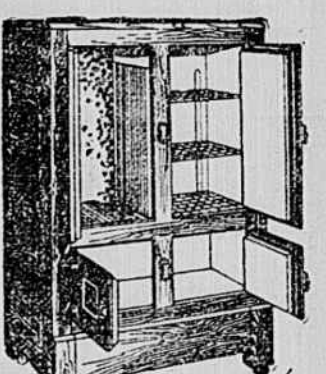

Every prospective bride plans for an ideal home in every way. The kitchen should come in for as much consideration as any of the other rooms of the home. Although the two articles mentioned above are indispensable for every home, no kitchen would be truly up-to-date or even complete without this wonderful time and labor saver—THE BOONE KITCHEN CABINET.

Whether the bride intends to do her own cooking or to merely supervise the work of the kitchen, the same obtains. With the Boone countless steps are saved, and the saving in time cannot be estimated. Every utensil is at hand, every cooking ingredient convenient in boxes, bins or cupboards within hand's reach. With the extension top, the entire meal may be prepared seated at the Boone.

GAS RANGE

The advantages of cooking by gas are many. Not the least of them all is its comfort in the home. At the present time that is a big consideration. The June bride would do well to start the new home right from the beginning. The gas range will eventually come—why not enjoy its advantages from the start.

As is the case with every commodity, there are many gas ranges on the market, each claiming various points of superiority. Consider them all from every angle, then witness a demonstration of the New Method—let us point out and explain their various improvements, every one of which is patented, and therefore EXCLUSIVE. Let us show you how they not only economize in gas, but make possible better cooking, eliminate explosions and produce the greatest possible convenience. All these points are obvious to any one witnessing a demonstration. THERE HAS BEEN TWICE AS MANY NEW METHOD GAS RANGES SOLD IN RICHMOND AS ANY OTHER ONE MAKE—that fact should be the best indication of its superiority.
